

Solar being installed on water purification system

SEPTEMBER 2018 HONDURAS ENERGY PROJECT

Over the past few months, we have been able to meet many of our goals in the effort to end energy poverty because of grants from worthy foundations like Rogovy. During our trip to Honduras in September, we were able to see firsthand how our cause can impact education, health and way of life to empower future generations!

Installed solar on 9 homes without electricity

Added a solar kit to power the local water purification system

Installed three solar kits on a local school with no electricity

Identified over 30 more schools in need of electricity

Honduran families impacted by having electricity in their homes for the first time
